Warner Bros. (retd.)
Romano Consulting

Kathy Shirley
World Management
Systems

Michael Speaker
City National Bank

Vince Torres
AT&T

Paul Watkins
Dignity Health Northridge

Stephanie Wiggins
Metrolink

WE ARE YOUR AMERICAN HEART ASSOCIATION

When it comes to health and longevity, where you live matters. That is unacceptable. Together with our Board of Directors, volunteers and supporters, we are redoubling our efforts to address health disparities and societal inequities to help create a Los Angeles where everyone can live a long and healthy life.

OUR PRIORITIES INCLUDE:

Increasing food security

We are transforming the food environment to make healthy food more affordable and accessible in all neighborhoods, but especially in communities experiencing the greatest inequities to accessing healthy food.

Building active communities

We are addressing barriers and transforming communities so that kids and families feel safe to walk, bike, play and be active where they live.

Addressing chronic conditions

We are improving blood pressure management for more than 2 million people, 2/3 of whom are impacted by systemic inequities that limit access to health care.
